EDUCATION

B.Tech in Computer Science and Engineering | Indira Gandhi Institute of Technology, Sarang 2022 – 2026
Odisha, India | **CGPA: 9.33/10** | No Active Backlogs

TECHNICAL SKILLS

Languages	Python, Java, JavaScript (ES6+)
CS Fundamentals	Data Structures & Algorithms, Object-Oriented Programming, Object-Oriented Design, Operating Systems, Computer Networks
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication, API Validation
Frontend	React.js, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, React Router, Axios
Databases	MongoDB, Mongoose, MySQL, Schema Design, Indexing
Engineering	Git, GitHub, Postman, Testing, Debugging , Troubleshooting, Agile, SDLC, Code Reviews

EXPERIENCE

Software Development Intern | Indian Railways June 2025 – July 2025

- Delivered a production **MERN stack internal workflow application** across planning, design, implementation, testing, and documentation, collaborating through the **full SDLC** in an Agile environment.
- Designed **12 reusable React.js components**, reducing duplicate frontend code by approximately **30%** through modular component architecture.
- Integrated **6 frontend modules** with **Node.js/Express.js REST APIs**; implemented client- and server-side validation to improve data integrity.
- Identified and resolved **15+ defects** during internal testing, reducing pre-release error reports by approximately **20%**.

System Engineer Intern | National Aluminium Company Limited (NALCO) May 2025 – June 2025

- Engineered a centralized internal portal for **4 departments**, translating requirements from department heads into maintainable software for operational data access and management.
- Built **9 REST API endpoints** and MIS, DPR, and MPR dashboards that surfaced real-time business metrics and eliminated manual report creation.
- Optimized JavaScript rendering using algorithmic improvements, reducing average page-load time by approximately **15%** across three browsers.

PROJECTS

AlgoVault | Full-Stack DSA Interview Preparation Platform GitHub | Live Demo

Goal: Build a platform for DSA practice, progress tracking, reviews, and mock interviews.

- Built a full-stack **React/Vite + Node.js/Express + MongoDB** platform covering **DSA problem management, coding patterns, practice tracking, review scheduling, and mock interviews**.
- Implemented **JWT authentication** and protected application flows, with Axios-based API integration and consistent client/server error handling.
- Added **AI-powered transcript evaluation** for mock interview sessions and theme support for a responsive user experience.

StudySphere | MERN SaaS Learning Platform GitHub | Live Demo

Goal: Build an all-in-one university platform for courses, assessments, and academic resources.

- Architected a multi-user **MERN SaaS platform** across **5 modules**, supporting course content, learning workflows, and progress tracking with modular backend/frontend separation.
- Implemented secure **JWT authentication and RBAC** across **3 roles: Student, Educator, and Admin**, protecting role-specific application capabilities.
- Designed **5 MongoDB schemas** using embedded and referenced data for course and progress management.
- Added **Cloudinary uploads, auto-graded quizzes, lesson discussions, assignment tracking, and Nodemailer notifications**.

CERTIFICATIONS

- Full Stack Web Development** – Udemy
- Responsive Web Design** – freeCodeCamp
